## February 7, 2020

### This Week in ELA:

We focused on letters Ee and Qq. Our "Pecking Hen" and "Quincy the Quacker" sound cards will help us remember the sounds these letters make. We also added *what* and *her* to the word wall. In writing workshop, we continued our How-To Writing. We know we think of something we know how to do, tell the steps out loud while counting on our fingers, select the number of pages we will need, and then get to work! Help your child think of things he/she knows how to do that could become a How-To book!

### This Week in Math:

We continued exploring number bonds, breaking apart numbers 5, 6, 7, and 8. The thinking is "part and part makes a whole." Read the email I sent out earlier this week to have a better understanding of how they work!

### This Week in Science:

We learned about Antarctica. We know that this area of the world stays very cold all year, with cold winds blowing almost daily. Animals like seals and penguins can stand the cold because of their feathers/fur and blubber.

February 28<sup>th</sup> Brody Nail

### Important Dates:

- 2/14 Early Dismissal
- 2/17 Holiday: Presidents' Day

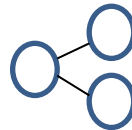

### Reminders/Announcements:

- Please return library books by Tuesday of next week.
- If your child is bringing Valentines, make sure they are not addressed TO someone specific. He/she can fill out the FROM part and drop them into bags that day. ☺

### Home Talk:

Tell your child this problem and see if he/she can show it in a number bond. There were 7 dogs. 4 were brown and 3 were black. (Keep in mind the whole number sits in the circle where both lines touch.)

Kailey Gary and Landon Philp
